DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1, 23-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Chang (U.S. D443,651). Chang teaches an apparatus, shown in figures 1-7, having a base and first and second sidewalls, shown in figure 1. The sidewalls are mirrors of each other, as shown in figure 1. To the degree the line has been defined in claim 31, the apparatus of Chang is symmetrical about a line extending through the second panel. The length set forth in claim 32 is considered to be the length of the side walls extending upwardly from the base of Chang.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2, 4-8, 10, 11, 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chang (U.S. D443,651) in view of Hansen (U.S. D322,463). Chang discloses the claimed invention except for the three panels of the bottom. Hansen teaches that it is known to provide trays with a bottom having three panels (see figure 4). It would have been obvious to one having ordinary skill in the art at the time

Art Unit: 3727

the invention was made to provide the apparatus of Chang with the bottom having three panels, as taught by Hansen, in order to allow contents to collect in the center of the tray.

Response to Arguments

5. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection. The new grounds of rejection were necessitated by the amendment filed July 10, 2006.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

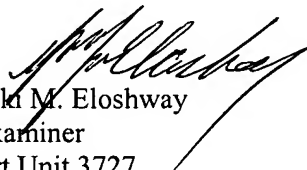

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
